Restore your energy. Freshen your appearance. Soothe daily stresses.

The Mediflow® Waterbase® state-of-the-art therapeutic pillow has been clinically tested and shown to actually improve your quality of sleep.

The Mediflow pillow has a soft, hypoallergenic fiber filling supported by an easy-to-fill water pouch. This waterbase helps support the neck and spine by actually adjusting as the user sleeps. The waterbase shifts to fill the gap needed for cervical support and cradle the head, thus reducing the chance of waking up with pain.

By simply adding water, you can adjust the support level of the pillow and find the setting that's right for you. Whether you prefer soft, medium or firm comfort, the Mediflow pillow can be customized to fit your needs.

Improves sleep quality and reduces neck pain by continuously adapting to changing sleep positions!

[LEARN MORE](#)

The Mediflow pillow was developed by Maurice Bard, CEO, after he suffered from a whiplash injury. His treatment involved using a water bottle under a pillow. This became the prototype for the Mediflow pillow, specifically designed to give your neck, back and shoulders the comfort of customizable support to alleviate chronic pain and stiffness.

The truly unique feature that sets the pillow apart is its Waterbase®. The water level in the base can be adjusted by the user to provide the perfect level of support for their unique physiology. Once the waterbase is adjusted to the optimum level, the system is ready to support that neck and spine by actually adjusting as the user sleeps. Users sleep on cloudlike polyester with the non-compressible base shifting to fill the gap needed for cervical support and cradle the head.

A Johns Hopkins University of Medicine study showed that the waterbase pillow was associated with reduced pain intensity, increased pain relief and improved quality of sleep.

A cushion of hypoallergenic polyester fiber rests over the water layer for luxurious comfort.

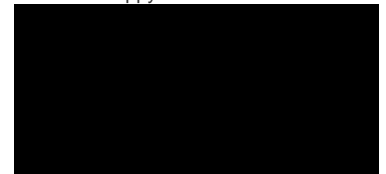

Thermal insulator surrounds the water layer.

An easy-to-fill water pouch provides gentle, responsive support all night long.

In a published clinical study conducted at the world-renowned Johns Hopkins School of Medicine, doctors found that Mediflow® Waterbase® sleep pillows ranked best overall in all aspects of quality of sleep tested, including how fast subjects fell asleep, how few times they woke up and overall quality of sleep. Additionally, the pillow was associated with reduced morning pain intensity and increased pain relief.
